

Farid Mahmudlu ■

Full-Stack & AI Software Developer | Computer Science BSc @ ELTE | Budapest, Hungary

hello@faridmahmudlu.dev | faridmahmudlu.dev | github.com/FaridMahmudlu | linkedin.com/in/farid-mahmudluu

Product-focused Computer Science student who founded one and co-founded four software products in 2026, building each end-to-end — data models, authentication and backend architecture, web and mobile interfaces, AI integrations and production deployment.

■ FOUNDING & ENGINEERING EXPERIENCE

Hushplan — Founder & Full-Stack Developer hushplan.app · Sep 2026 – Present

- Founded and solely built a privacy-first group-planning product (Flutter app + Next.js 16 website) where members set private spending limits and the group sees only which options fit.
- EU-hosted Supabase/PostgreSQL backend with RLS, a non-exposed private schema and membership-checked SECURITY DEFINER RPCs; every privacy rule covered by pgTAP tests.
- Shipped v1.0 to Google Play internal testing: FCM push, 7 languages, 36 currencies, Cloudflare Turnstile, CI and daily encrypted backups.

Calisiyo — Co-Founder & Full-Stack Developer calisiyo.com.tr · Aug 2026 – Present

- Co-building a YKS study SaaS: Next.js/React flows for planning, Pomodoro, goals, resources, mock-exam tracking and spaced review.
- Supabase data and auth with Realtime, migrations/triggers, private storage policies and OAuth/PKCE; PostHog, Sentry, web push and Playwright.

Parabola — Co-Founder & Full-Stack Developer parabolafrontend.vercel.app · Jul 2026 – Aug 2026

- Owned backend/database, then frontend delivery, for a live recommendation-based fashion marketplace; supported launch and the first store onboarding.
- Java 17/Spring Boot services (Spring Security, JWT, JPA, PostgreSQL, OpenAPI) incl. a fit engine that scores body-profile compatibility and recommends sizes.

ShareVibe — Co-Founder & Full-Stack Developer share-vibe-fawn.vercel.app · Apr 2026 – Jun 2026

- Multi-tenant, QR-based cafe social platform: table-specific guest flows, media sharing, campaign rewards and independent owner workspaces.
- React/TypeScript + Firebase Auth/Firestore/Storage with generated security rules and role-based access; VDS/Nginx deployment with HTTPS and security headers.

Avalabs — Co-Founder & Full-Stack Developer avalabs-website-1.vercel.app · Feb 2026 – Jun 2026

- Led the entire technical build of an AI social-media intelligence product: frontend, backend, database, auth, Instagram integration and AI orchestration.
- Multimodal pipeline — FFmpeg frame/audio extraction, Whisper transcription and selectable GPT/Gemini/Claude analysis (Next.js, Prisma, Supabase, Clerk).

■ SELECTED TECHNICAL PROJECTS

CanvasFlow canvas-flow-nine.vercel.app · Sep 2026 – Present

Open-source Canvas LMS command centre: AES-256-GCM token encryption, rate-limit-adaptive sync, VAPID web push and 51 unit/integration tests (Next.js, Prisma, Supabase).

StockFlow GitHub · Jul 2026 – Present

NestJS + Prisma/PostgreSQL and Expo React Native: atomic inventory transactions with audit logs, 3-role RBAC, JWT/Passport, Socket.IO real-time and EAS builds.

QuickScript AI GitHub · Dec 2025 – Feb 2026

Node.js/Express + OpenRouter short-form script generator: Hook → Body → CTA output, 6 languages, tone and platform controls.

Real-Time Hand Tracking GitHub · Nov 2025 – Dec 2025

MediaPipe/OpenCV hand tracking (Python prototype, C++20 build) with One Euro filtering, driving OpenGL particle effects.

Additional: RepRecord — Telegram workout tracking + progress charts | Mockwise — AI product mockups | TriCharge — React/Node/Supabase/Stripe e-commerce | Cookly — personalised recipe generation | Last Flame — co-op hackathon game

■ TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, Java, Dart, C, C++, C#
Frontend / Mobile	React, Next.js, React Native, Expo, Flutter, Vite, Tailwind CSS, Redux Toolkit
Backend / Data	Node.js, Express, NestJS, Spring Boot, PostgreSQL, Supabase, Prisma, Firebase / Firestore, JPA, pgTAP
AI / Systems	OpenAI, Whisper, Gemini, Claude, OpenRouter, FFmpeg, MediaPipe, OpenCV, Socket.IO, JWT / OAuth, Docker, Playwright, Sentry, PostHog

■ EDUCATION

Eötvös Loránd University (ELTE)
BSc in Computer Science · 2025 – expected 2028

■ CERTIFICATION & LANGUAGES

Google AI Essentials — Google, Jul 2026
Azerbaijani (Native) | Turkish (C1) | English (B2) | Russian (A1) | Hungarian (A1)
